LABELING & MARKING

The labeling solution ecological and efficient

Zero waste (no scraps and no silicone support to be disposed of). It uses paper (direct thermal too) or plastic material that is cheaper than the sandwich used for conventional self-adhesive labels. Extremely robust, it was created for 24/7 operation and for the most severe industrial cycles. It guarantees unique autonomy (thanks to the capacity of the roll consisting of front material only). Efficiency and simple and intuitive control through the Man Machine instinctive interface, with all the most advanced features. It guarantees maximum connectivity to the line and the information system, latest generation web services and remote monitoring, via A.R.C.A. App and software Overview

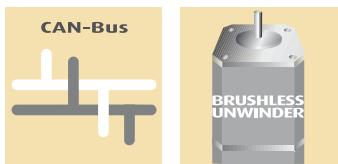

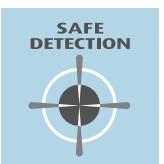

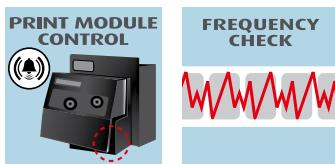

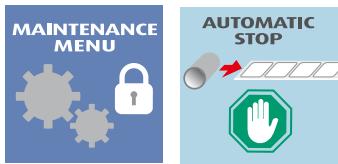

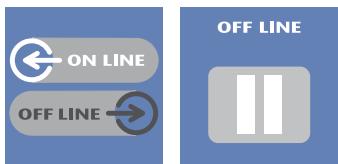

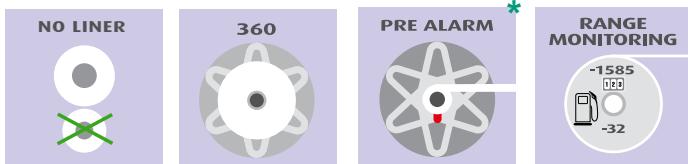

La soluzione di etichettatura ecologica ed efficiente

Zero scarti (niente sfridi e niente supporto siliconato da smaltire). Utilizza materiale cartaceo (anche termico diretto) o plastico più economico del sandwich impiegato per le etichette autoadesive convenzionali. Robustissima, nasce per il funzionamento 24/7 e per i cicli industriali più severi. Garantisce un'autonomia unica (grazie alla capienza del rotolo costituito da solo materiale frontale). Efficienza e controllo semplice e intuitivo mediante Man Machine instinctive Interface, con tutte le funzionalità più avanzate. Garantisce la massima connettività verso la linea e il sistema informativo, servizi web di ultima generazione e monitoraggio remoto, via A.R.C.A. App e software Overview
